Public Health Officials Announce 8,757 New Cases of Coronavirus Disease

More than 1 million cases of COVID-19 reported in Illinois

SPRINGFIELD – The Illinois Department of Public Health (IDPH) today reported 8,757 new confirmed and probable cases of coronavirus disease (COVID-19) in Illinois, including 177 additional deaths. Illinois has now reported more than one million cases since the beginning of the COVID-19 pandemic.

“In a pandemic that has contained far too many tragic milestones, today’s marking of one million cases of COVID-19 diagnosed in Illinois deserves particular recognition,” said Governor JB Pritzker. “As this disease continues to wreak havoc on our nation – with the United States setting another record for the most COVID-19 deaths in a day just yesterday – it is critical that we take extra caution today and in the months ahead to reduce the spread, bring down hospitalization rates, and save lives. Now that vaccine distribution has begun, we can see the light at the end of this difficult time – let’s do everything we can to ensure all of our neighbors are able to be there as we cross that finish line, healthy as well. With that goal in mind, I encourage all Illinoisans to choose to receive the protections of the COVID-19 vaccine when it’s your turn in line.”

“As the vaccine rolls out, our hope, and goal, is that the number of new cases we see each day will decrease,” said IDPH Director Dr. Ngozi Ezike. “Reporting more than one million COVID-19 cases in Illinois seemed like an unlikely number at the beginning of the pandemic, and we’ve now all seen how devastating this disease can be. I urge everyone to continue to wear their mask, avoid social gatherings, and get vaccinated when it’s your turn.”

Currently, IDPH is reporting a total of 1,008,045 cases, including 17,272 deaths, in 102 counties in Illinois. The age of cases ranges from younger than one to older than 100 years. Within the past 24 hours, laboratories have reported 105,518 specimens for a total 13,803,946. As of last night, 3,921 in Illinois were reported to be in the hospital with COVID-19. Of those, 783 patients were in the ICU and 450 patients with COVID-19 were on ventilators.

NEWS RELEASE

The preliminary seven-day statewide positivity for cases as a percent of total test from December 31, 2020 – January 6, 2021 is 8.5%. The preliminary seven-day statewide test positivity from December 31, 2020 – January 6, 2021 is 9.8%.

The previous mask mandate established through an emergency rule to the Control of Communicable Disease Code expired on January 3, 2021. However, a subsequent emergency rule was filed January 4, 2021 and is in effect for 150 days.

*All data are provisional and will change. In order to rapidly report COVID-19 information to the public, data are being reported in real-time. Information is constantly being entered into an electronic system and the number of cases and deaths can change as additional information is gathered. Information for a death previously reported has changed, therefore, today's numbers have been adjusted. For health questions about COVID-19, call the hotline at 1-800-889-3931 or email dph.sick@illinois.gov.
